Chapter 4

How to create the Light Graffiti Effect

The tool used for post processing the video material is Kdenlive. It should be accessible through the apt-get command. Once installed it handles much like any other video editing software. The effect you are looking for is called "Light Graffiti" and can be found under:
Effect List/Misc/ Light Graffiti

Examples can be found at:

- Youtube video of a roomba following a certain letter sequence
- Youtube video of a roomba following a certain letter sequence
